# Pennsylvania Mapping And Geographic Information Consortium

[www.pamagic.org](http://www.pamagic.org)

"Serving Pennsylvania in a very  
spatial way."

## What is PaMAGIC?

The Pennsylvania Mapping and Geographic Information Consortium, or **PaMAGIC** is a not for profit organization that provides leadership and guidance in the establishment of Geographic Information Systems (GIS) throughout the Commonwealth of Pennsylvania. **PaMAGIC** also strives to promote the identification of data sources, standardization of data, the access of data and information about service providers, as well as educate communities, governments, and corporations in the development of GIS and GIS data. **PaMAGIC** is an invaluable information resource – a resource of growing significance as we head towards a digital economy.

## Why PaMAGIC?

Every day, Pennsylvania's workers increase their use of information technologies to assist in the performance of our jobs, as well as create new employment opportunities. PaMAGIC's leadership provides a vision and foundation upon which to build the infrastructure, from the bottom up, that local Pennsylvanians need for productive business, informed government, realistic education and effective research. Its vision and mission statements were created with this in mind.

## -Vision-

The Citizens of Pennsylvania will have a coordinated, flexible, and integrated geographical information infrastructure to support better decision making and more efficient use of limited resources.

## -Mission-

To provide leadership, coordination, and guidance to enhance the development, use and access to spatial information and related services.

## Membership & Sponsorship

**PaMAGIC** encourages everyone to become a member. We also need sponsors. If you choose you can be both a member and a sponsor.

A **member** pays an annual membership of \$25 and is entitled to voting privileges. There is no fee for a **student membership**, we ask that students submit a copy of their student id or provide their valid school email address.

A **sponsor** donates money, goods, and or services to PaMAGIC. Both members and sponsors are encouraged to attend all PaMAGIC and GIS related meetings and will receive all distributed materials.

## Who can be a Member?

Any individual that is interested in helping Pennsylvanians to become leaders in the bottom up deployment of this technology will find kindred spirits in membership. Anyone who wants to be part of forging the solution should become a member.

## PaMAGIC Goals

1. Provide leadership in Pennsylvania that address current trends in geographic information technology and associated issues.
2. Develop a strong partnership with business, academic community, and government to collect, maintain, share and use spatial data.
3. Promote the transition from hard copy maps and records to use of GIS technology and related digital data.
4. Represent the needs and concerns of GIS users to federal, state, and local officials.
5. Facilitate communication over related issues between professionals throughout Pennsylvania.
6. Facilitate cost-efficient mechanisms for cooperation between GIS and spatial data users in Pennsylvania, to reduce duplication of effort and inefficient use of limited resources for such activities.
7. Assist in development of consistent content, format, and exchange standards for digital geographic information users within the Commonwealth.
8. Render annual report to legislative and government offices and Pennsylvania citizens concerning the state of GIS in Pennsylvania.
